Add 'is (n)one of' to 'apply condition' object [Open Discussion](#)

- KM Koen Meulenkamp
- **Forum name:** #Verbetervoorstellen

In the profile builder there is a nice function to select with the 'is (n)one of' function, I would love to see this feature in 'apply condition' as well.

Now If you have to check 10-14 values you have to configure loads instead of just pasting all the values.
