Add the regular Quickmail and Quicksms options next to Quicktest in the ribbon Closed - Not enough votes

- Maarten Koot
- **Forum name:** #Verbetervoorstellen

This way you'll have the option with the Email or SMS pre-filled directly without the need to undo the test settings.

Explanation:
In the Email and SMS editor the only option to start a broadcast is the Quicktest button. This button start the Wizard but also prefills test settings, i.e. for Email:
Select target: Test data
Test label on
E-mail target: Test E-mail

You'll have to 'undo' these pre-filled settings to start a regular broadcast.
