CTRL + click for open in new tab [Open Discussion](#)

- Koen Meulenkamp
- **Forum name:** #Verbetervoorstellen

Really happy with the new function "open in new tab", so thanks for that!

The only downside is that it opens and focusses on this tab. Let's say I open 10 e-mails, I have to jump back everytime.

Normal web-behaviour is that CTRL+L-CLICK = open in new tab without focussing. This would be lovely to have throughout DeployTeq.

Or maybe let the button "open in new tab" do not focus :) But I can imagine other people do like the focus.
