Datamodel: add the option to make notes Open Discussion

I would like to be able to make notes in the overview in the data model, similar to analytics, so that explanations can be provided for the tables.

Ik wil graag aantekeningen in het overzicht in het het datamodel kunnen maken, zoals bij analytics, zodat je bij de tabellen uitleg kan geven.

Tables already have a description field. If you mouse over tables, it shows a pop-up with the table name. Perhaps if the pop-up instead shows the content of the table description...?
