EmailType and UTM overview within campaigns Closed - Not enough votes

- Chantalle de Heer

It would be great if we could see an overview within the campaign (like another tab or page) in which we can update the EmailType and UTM's for ALL emails within the campaign. Right now you would have to check every email one by one, also, in campaigns the EmailType used is not the one within the email, but the one in the send email object (which a lot of customers don't know). With an overview it is easier to see and update this.
