Move multiple groups at once (in group overview) [Open Discussion](#)

- Chantalle de Heer
- **Forum name:** #Verbetervoorstellen

It's currently only possible to move every group at one by one, so if I'd like to move 100 groups to another group, let's say '2023', then I would have to move every group one by one. It would be great if we could select groups and move them all at once.
