Profiles: add a date range option to the Received mail object [Open Discussion](#)

- Deployteq - Suzanne Martens
- **Forum name:** #Verbetervoorstellen

It would be nice to have more date options in the Received mail-object in a Profile. Currently, you can select an absolute From-date, or a relative date (Today or offset).

There is now only a From-date. Please add the possibility to add an optional end date. This way, it will be possible to select customers who received a certain mail in between two dates.
