Profiles: add a date range option to the Received mail object [Open Discussion](#)

- Deployteq - Suzanne Martens
- **Forum name:** #Verbetervoorstellen

It would be nice to have more date options in the Received mail-object in a Profile. Currently, you can select an absolute From-date, or a relative date (Today or offset).

There is now only a From-date. Please add the possibility to add an optional end date. This way, it will be possible to select customers who received a certain mail in between two dates.

The screenshot shows a 'Configure' dialog box with a blue header. On the left, there is a grey sidebar with the text 'Selects customers who did or did not receive a given mailing'. The main area is titled 'Received mail' and contains several settings:

- Received:** A dropdown menu with 'Received' selected.
- Type:** A dropdown menu with 'Specific content' selected.
- E-mail:** A text input field containing 'Testmailing version A'.
- Use date selection:** A dropdown menu with 'Yes' selected.
- From date:** A dropdown menu with 'Absolute date' selected.
- Is:** A date input field containing '19-03-2024' and a calendar icon.

At the bottom right, there are two buttons: 'Confirm' and 'Cancel'.
