Webhook/Magento/Spotler start object: only add records to campaign when active Closed - Not enough votes

- Chantalle de Heer
- **Forum name:** #Verbetervoorstellen

When a campaign contains a start object such as Webhook/Magento/Spotler, records will be added to the campaign, even if the object is not used. Can we deactivate the start object when this object is not connected to a flow in the campaign? These objects add customers to campaigns they shouldn't be in (since they never went through the campaign) as well as registering a lot of campaign events, making it seem like campaigns are active when they are not.
