Where can I find the release notes?

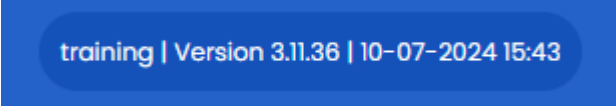

Deployteq - Suzanne Martens - 2024-07-10 - Comments (0) - General

You can find the weekly release notes in three ways:

- Via the pop-up in Deployteq itself when you log in after a release. This always takes place on Sunday evening. So, if you log in on Monday morning, you will see the new release notes.

- By clicking on the field with the name of the portal, the version number, and the date and time, located in the top right corner of the bar in Deployteq.

training | Version 3.11.36 | 10-07-2024 15:43

- By visiting <https://docs.deployteq.net/dug/release-notes>. Here you will also find the quarterly overviews.
