Actually show all file info in File Manager Open Discussion

It's bothering me that in the File Manager when looking up files on the SFTP or in folders related to the CSV-trigger, no file information is shown. See yellow marked areas in screenshot. I would love to have these available (especially the timestamps relating to the moment of creation and the last edited).

Hi Jurrian, Good request. It's a duplicate from what I requested earlier:
https://support.deployteq.net/nl/community/view/actually-show-all-file-info-in-file-manager.

If I am now in a remote folder in DeployTeq, I do not see the creation or update date of the files there. Is it possible to add this? Als ik nu in een remote folder zit in DeployTeq, dan zie ik daar niet de datum van creation of update van de bestanden. Is dit mogelijk om toe te voegen?
