Imports: change repeating import description Closed - Not enough votes

I find it hard to update the description for a recurring import because I have to navigate through the import setup each time to select a data file. Adding an option to 'Change description' alongside 'Change path' would greatly improve the process and make it more convenient for making description modifications.

Would also be helpful to be able to see the description history, or to have an option to 'show all repetitions', so we will still know which descriptions are for the same import.
