Include a custom javascript runtime object (similar to Zapier's Code object) Closed - Not enough votes

- MR Mischa Rinck
- **Forum naam:** #Verbetervoorstellen

For data manipulation purposes, it would be very useful to have a javascript-code object within DT campaigns - similar to the "Code By Zapier" zap type where you can set variables to be inserted into the code, run custom javascript and retrieve the output in following parts of the flow.

Voor data manipulatie doeleinden zou het zeer nuttig zijn om een JavaScript-codeobject binnen DT-campagnes te hebben, vergelijkbaar met het "Code by Zapier" zap-type, waarbij je variabelen kunt instellen om in de code in te voegen, aangepaste JavaScript kunt uitvoeren en de uitvoer kunt ophalen in volgende delen van de workflow.
