Integration with Microsoft Teams to add a Teams-link to your e-mail Closed - Not enough votes

- PI Paula Isphording
- Forum naam: #Verbetervoorstellen

We make use of Microsoft Teams. It would be great if it would be possible to create Teams-links in Deploy we can send to our clients.

At the moment we generate the link within Teams, and then paste the link into a campaign field, which we load into the mail/.ics file.
