Notification for each feature request in the community Closed - Fixed

- D Daniel
- **Forum naam:** #Verbetervoorstellen

I would like to receive a notification every time a new feature request is added to the community so that I can vote on it.

Ik zou graag een notificatie krijgen, elke keer dat er een nieuw verbetervoorstel in de community wordt toegevoegd zodat ik er op kan stemmen.

Hi Daniel, good one! In order to receive notifications it is necessary to subscribe to Community updates, but I see you have done this already. I am looking into it with our Support Portal software supplier, to see why only some notifications are sent out.

Update January 2025

This should now be the case. An email is sent out to all subscribers for each new or changed topic.
