Overview: all notifications & overrides - emailadresses Open Discussion

- Chantalle de Heer
- **Forum naam:** #Verbetervoorstellen

It would be great if we could have an overview of all notifications such as:

- Import success/error
- Export success/error
- Codelist threshold
- All campaign overrides (in a seperate overview?)

Can we also make it possible to replace a notification/override e-mailadress (or phonenumber) for everything at once? So when person A is replaced by person B (new employee), replace this emailadress (or phonenumber) in all notifications and overrides.

Would also be great to be able to select notifications/overrides and add/remove an e-mailadress (or phonenumber) to/from all of them at once.
