Profiles: add a date range option to the Received mail object [Open Discussion](#)

- Deployteq - Suzanne Martens

It would be nice to have more date options in the Received mail-object in a Profile. Currently, you can select an absolute From-date, or a relative date (Today or offset).

There is now only a From-date. Please add the possibility to add an optional end date. This way, it will be possible to select customers who received a certain mail in between two dates.

The screenshot shows a 'Configure' dialog box with a blue header. On the left, there is a grey sidebar with the text 'Selects customers who did or did not receive a given mailing'. The main area is titled 'Received mail' and contains several settings:

- 'Received' (dropdown menu)
- 'Type: Specific content' (dropdown menu)
- 'E-mail: Testmailing version A' (text field)
- 'Use date selection: Yes' (dropdown menu)
- 'From date: Absolute date' (dropdown menu)
- 'Is: 19-03-2024' (text field with a calendar icon)

At the bottom right, there are 'Confirm' and 'Cancel' buttons.
