Add already formatted email objects as a variation Closed - Not enough votes

In the email builder, it would be helpful if you could also combine already formatted objects as variations by dragging them onto each other. Currently, this is only possible with blank objects that you drag directly from the library.

In de e-mail builder zou het fijn zijn als je reeds opgemaakte objecten ook als variaties aan elkaar kunt toevoegen door ze op elkaar te slepen. Nu kan dat alleen bij objecten die je blanco rechtstreeks vanuit de bibliotheek sleept.
