Update multiple fields during import [Open Discussion](#)

- BC Bart Cépère
- **Forum naam:** #Verbetervoorstellen

I want to be able to update more than one field during an import here (see image).

Ik wil hier (zie image) meer dan 1 veld kunnen updaten tijdens een import.

Import Wizard - Create import

Step 1: Select file for import

Step 2: Select file for import from archive

Step 3: Define file-format

Step 4: Define datafields

**Step 5: Key settings**  
Define what should be done with the customers that are found based on the key-settings in the previous step.

Step 6: Scheduling

Step 7: Verify the settings

Existing customers

Update customer data

Do not update customer, keep old data

Add customer to group

Fill field  with value:

New customers

Insert customer data

Do not insert new customers

Add customer to group

Fill field
